1	1	Eqp	AUTOMATIC SAMPLE CHANGER XSAMPLE 631 INCL. 36 POS/12 mL DMA, ANTON PAAR PN 267719 XSAMPLE 631 INCL. 36 POS/12 mL DMA The fully automatic sample changer for DMA performs measurements of high viscous or even waxy samples at temperatures of up to 95°C. With three cleaning agents a great variety of samples can be drained out of the measuring system without manual interaction. The heated magazine has a capacity of 36 samples. Xsample™ 631 electrically heats highly viscous samples (e.g. waxes or residual fuels) up to 95 °C (203 °F) to decrease their viscosity. Under pressure, it then fills the samples automatically from sample vials into the measuring cell(s) of the master instrument. Different filling modes available to suit varying applications. After each measurement, Xsample™ 631 automatically rinses and cleans the measuring cell(s) with up to two rinsing liquids, and subsequently dries the cell(s). The magazine holds 36 vials with a volume of 12 mL. Comes with: • 1 pc. Power cord • 1 pc. ACCESSORY KIT DMA™ • 1 Instruction Manual • 3 pcs. BOTTLE FOR LIQUIDS Includes: STAND FOR Xsample PN 87584 SAFETY WASTE CONTAINER PN 87585 TEST TUBE RACK 12 ml / 60 POSITIONS PN 24024 NEEDLE Xsample 631 H4	88.230,00	88.230,00
